The Art Of Creation

Name | The Bubble

Design | Karine Bonjean

Year | 2021

Photography | Jente Willems

Customisable and Durable Luxury

Evolution21's latest flagship is called the 'Bubble Sofa'. Karine Bonjean went above and beyond to create an exquisite and welcoming sofa for every family that cherishes togetherness.

Her Belgian craftsmanship, eye for detail and decades of experience with high-quality fabrics and materials have led to the creation of a unique masterpiece which we are proud to bring into the world.

Its design consists of eight different elements which can be combined in endless ways. This allows for different types of settings suitable for every occasion.

Not only is the way in which you combine the different pieces completely customisable, you can also choose the finish and fabrics yourself in consultation with our team of experts so that our Bubble Sofa will fit seamlessly into your interior.

You even have the choice between two different types of cushioning. One is firmer so you can sit up straight and your back and limbs are well supported for slightly more formal occasions. The other is on the softer side so you can sink in completely comfortably. Perfectly suited for cosy evenings with the whole family in front of the fireplace.

To ensure that this opulent piece of furniture will last for generations, we opted for high-quality walnut for the wood back support and metal casing for the legs. Not only is this a durable solution, it looks stylish as well so that the Bubble Sofa fills the room with beauty from every angle.

"We create the evolution in your home."
